

X-Power, a brand-new kind of X-Yachts...

X-Yachts A/S, Haderslev, 11 August 2020

X-Power 33C – a powerful experience...

With more than 40 years of experience in high performance sailing boats, X-Yachts is now introducing a whole and extraordinary initiative, based on some of the deep experience they have – a 33 feet open powerboat for quality-conscious boaters, with exactly the same overall strategy. Fast and safe on the water, superior pleasure with ownership, innovative development and design. The powerboat is planned for launch in January 2021, and the important milestones are reached by close supervision of designers, boat builders, engineers and technicians.

CEO of X-Yachts, Kræn Brinck Nielsen explains: *“What we are creating here is unique. With this powerboat, we are appealing to people who love to go on the water and to become one with the sea for the weekend, or to spend an active day offshore. Like with our sailboats, high quality and safety goes hand in hand with performance in this new product line.”*

X-Yachts celebrated their 40 years anniversary in 2019, and one of the anniversary presents was the chance offered, also to start-up powerboat production.

“Our owner, Ib Kunøe and I discussed what could bring X-Yachts into the 5th decade, and we quickly recognized that introducing a comfortable ease of use powerboat on the market, would be a very interesting but also a highly challenging assignment.”, Kræn Brinck Nielsen continues.

And so they did...

X-Yachts is confident that the new powerboat range will seem like a gift for the discerning sailor. The first model is produced with an inboard engine, a patented petestep® designed hull making the driving experience smooth and elegant. They also promise that the operation will be an intuitive experience, eliminating the need for a user manual, enabling everyone to run the boat feeling fully secure.

*“We would like to share this boating experience with our loyal long-time and new X-Yacht owners, and in general with people who haven’t had the chance to get familiar with the **famous X** and what it stands for. In the coming months, we will show the public what we are working on. In the meantime, everyone can look forward to this new wonder of ours”*, Kræn Brinck Nielsen concludes.

The X-Yachts yard in Denmark continues to develop and produce luxury performance cruiser yachts along with the new production of motorboats. The first X-Power model will be launched in January 2021, the second being a closed model is planned for launch in September 2021, and finally for now, the yard has planned yet another X-Power launch in January 2023.
