

X-POWER
BY X-YACHTS OF DENMARK

THE POWER OF PERFORMANCE

An aerial photograph of a speedboat moving across a body of water. The boat is leaving a large, circular, white wake behind it, which contrasts sharply with the deep turquoise color of the water. The boat itself is a light brown or tan color with a dark grey cabin area. The perspective is from directly above, looking down at the boat and its wake.

"With this powerboat, we are appealing to people who love to go on the water and become one with the sea for the weekend, or spend an active day offshore. Like with our sailboats, high quality and safety goes hand in hand with performance in this new product line."

DRIVING PLEASURE & EASE OF USE

With more than 40 years of experience in high performance sailing boats, X-Yachts has introduced an extraordinary initiative. A fleet of stylish powerboats for quality-conscious boaters, based on the same overall strategy as our sailing yachts. Fast and safe on the water, and an innovative design that provides superior pleasure to the owner.

The first model - X-Power 33C - was launched in January 2021, and the important milestones were reached by close supervision of designers, boat builders, engineers, and technicians.

CEO of X-Yachts, Kræn Brinck Nielsen explains: "With this powerboat, we are appealing to people who love to go on the water and become one with the sea for the weekend or spend an active day offshore. Like with our sailboats, high quality and safety goes hand in hand with performance in this new product line."

BOW ANCHOR

The X-Power comes with an anchor locker and anchor gate as standard. A fully automated retractable bow anchor system with remote launch is optional.

STERN ANCHOR

An electric stainless steel anchor system is optional.

DECK MATERIALS

The X-Power 33C is fitted with antislip paint on the side decks and Flexiteek with black caulking in the cockpit as a standard. The side decks can be upgraded with Flexiteek or real teak FLEXITEEK / TEAK.

Planked Flexiteek with black caulking is standard in the cockpit. Teak deck with black caulking is optional.

THE COCKPIT

Danish design is famous for its clean timeless style. The X-Power 33C is a showcase of luxury in the cockpit design and has plenty of space with practicality and functionality. The perfect boat for a couple weekend getaway or when inviting friends for cocktails. The huge sofa area can easily accommodate this.

The cockpit area of the X-Power 33C is spacious with 3 pilot seats and 8 sofa seats.

COCKPIT TABLE

A cockpit table as shown on the photos is optional. The height of the table is electrically operated, and when the table is in low position it gives space to install a full width sunbed. It is possible to upgrade for the bigger luxury table edition with cupholder and tray. An additional option is an extra table to fit at the end of the existing, this can easily be folded and stored in the aft locker.

PANTRY

The pantry of the X-Power 33C has a fully functional galley with a one burner stove, practical wet bar with hot/cold water and a cooling drawer as standard. An extra cooling drawer is optional. When not in use, the pantry is closed, tidy and serves as extra table space.

THE ENGINES

The X-Power 33C comes as standard with a Yanmar 8LV 320 hp engine. Optionally, the boat is offered with a 350 or 370 hp version.

As an added safety option to the single engine installation, a bow thruster can be chosen. The bow thruster provides 2.2 kW and enables the driver to maneuver the X-Power 33C near coastal waters, channels or when entering or leaving a port.

OUTBOARD - NEW 2022

In 2022 single or twin outboard will be introduced. This has additional functionality like joystick steering / maneuvering and GPS anchor to lock the boat at position at dock or as temporary anchor. With a single outboard the range will be 250 hp to 400 hp. With a twin installation the range will be 2 x 200 hp up to 2 x 250 hp.

HELM STATION

The Helm Station is carefully designed to be user-friendly and intuitive allowing the driver to focus on enjoying the boat ride in comfort and safety. The navigation system is operated via two integrated 16" standard screens from Simrad. With only a few operating items at the control console, the boat is easy to pilot for the skipper.

The built-in control units fit seamlessly into the panel, and thanks to intuitive guidance and large buttons, the panel is quick and easy to operate.

CZONE CONTROL AND MONITORING

The X-Yachts Design Team has created a unique 'Ease-Of-Use' experience like we know it from high-tech cars and the modern houses that many of us live in today.

CZone is an advanced yet intuitive digital switching system that controls and monitors all vital functions with a few steps. Based on a 10" touch screen, the owner will be able to select a preprogrammed mode that is activating all features required for the various situations the boat will be used in.

When entering the boat, one button will do the work - including turning on the LED lights at the right dim. When you are ready to drive, again, one button will do the work, as the CZone will automatically switch on the main breakers and power up the navigation, autopilot system and more for fast and easy departure.

When safely back in the harbor, CZone powers down the complete boat, but keeps the lights on for you long enough to safely leave the boat.

SUPERSAIL

X-Yachts newest feature is an advanced remote system from SuperSail. The SuperSail System allows you to monitor your vessel and control the onboard system from anywhere in the world.

The features are all controlled from one intuitive application, which is available for free on iPhone and Android. Monitor every aspect of your vessel from the status of the shore power to the water level in your bilge, and receive an alarm by text message if uninvited guests enter your boat, or your boat is being moved.

PETESTEP®

IN THE PRODUCTION OF
X-POWER 33C, WE ARE
USING THE PATENTED
PETESTEP® TECHNOLOGY
THAT OFFERS A MORE
COMFORTABLE AND
FUEL-EFFICIENT BOAT RIDE.

SOFTER

Conventional spray rails with their flat surfaces are associated with hard landings. Petestep® deflectors, on the other hand, dampens landings and lowers slamming by up to 50%, resulting in unmatched ride comfort.

QUIETER

No more clatter in waves! Because Petestep® hulls don't have any horizontal flat surfaces that smash the water under the hull, the biggest source of hull noise is removed. This makes Petestep® hulls create a lot less noise from waves, which significantly adds to the comfort of the ride.

LEANER

Petestep® hulls reduce resistance by removing friction and reducing energy waste. Up to 35% less energy is required to propel the boat forward, which could lead to significantly lower fuel consumption at comparable level of comfort.

MORE STABLE

Petestep® hulls increase stability, both at speed and at the dock. At zero speed, Petestep® hulls have a wider footprint that makes the boat less prone to heeling. When at speed, the deflectors stabilise the boat, once again contributing to a better ride.

THE CABIN

When creating the interior of the X-Power 33C, the designer has selected the very best quality materials giving a luxurious first impression. The cabin cushions are produced in a durable upholstery and will ensure a comfortable lying position and a good night's sleep. Furthermore, there are plenty of light sources in the cabin.

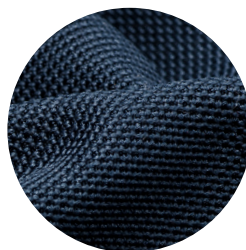

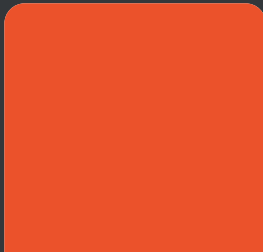

FABRIC OPTIONS

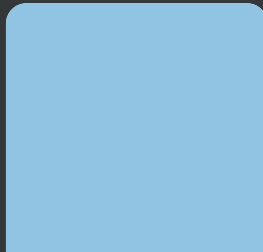

The high-quality textiles are not only stylish and comfortable, but also carefully selected to withstand saltwater and sun.

Various colors are available.

X-POWER IS AVAILABLE IN VIRTUALLY ALL COLOURS

The first power boats that left the yard were red and named The Red Baron.

X-Power now comes with three hull treatment options:

- Lacquered hull available in all colors
- White gelcoat finish
- Full foil wrapping in all colors and custom prints

Only the imagination defines your dream X-Power.
